

To Protect Mankind and the Environment

At the Imperial Hotel, we strive for a reduced usage of plastic in our guest room amenities.

In accordance with the government's 'Acts Towards Promotion of Plastic Resource Recycling', we try to select plant-derived products such as bamboo, wood, etc., through 2022.

Our target figure for fiscal 2022 is a 70.2% reduction in emissions, which is a 110,000-ton decrease compared to fiscal 2019.

With the support and cooperation of our patrons, we expect to be able to attain our goals for future sustainability.
